

Business Analysis

Get It Right the First Time

Innovative Development LLC has developed a Center of Excellence focused on Business Analysis (BA) services and flexible resource staffing models. Our experienced consultants use industry standard processes and tools via the IIBA BABOK (Business Analysis Body of Knowledge), SWEBOK (Software Engineering Body of Knowledge), and PMBOK (Project Management Body of Knowledge) standards. We have expertise in Business Analysis methodologies and Lifecycles including Agile/Lean Six Sigma, BPM, Business Rules, BI, CMMI/Waterfall and Data Management approaches. Additionally, Innovative Development has aligned our BA services with CMMI, BABOK, PMBOK, SWEBOK, and other Body Of Knowledge certifications. Many of these approaches are based on the principles of human interaction management and founded on a process view of human collaboration. Our flexible staffing model has been utilized at many of our clients. Our Business Analysis services include:

Business and System Analysis of all phases of a System Development Life Cycle (SDLC), which includes planning, requirements gathering, design, development, testing, delivery and support.

Six Sigma based process improvement methodologies, Quality Management and tools.

Analysis and design of outsourced teams (e.g. eDiscovery, system development and maintenance) including Outsource Auditing of current providers.

Creation of Business Analysis Offices (BAO) based on CMMI principles that include Definition, Roadmap Execution, Implementation and ongoing operations of the business analysis and development coordination efforts within a PMO.

Flexible staffing models that allow for “dial-up and dial-down” of resources from a baseline service level.

No matter the size of your project or project services team, we can provide Business Analysis services to assist you in the creation of clearly defined requirements and designs in order to ensure a successful implementation (e.g. we can take on complete project responsibility, provide outsource BA resource pooling, provide individual BAs based on customer’s requirements, create and run the BAO, etc.). At Innovative Development we understand the importance of „getting it right the first time . Our experience with methodologies and “hands on” expertise allow us to deliver consistent and unmatched results for our clients.

For further information on the Business Analysis services offered at Innovative Development or to schedule a meeting to discuss your Business Analysis needs, please contact us at our Corporate Headquarters or consult with your Innovative Development Customer Account Manager.

RESULTS MATTER

The senior management of Innovative Development, LLC has over 25 years experience providing IT consulting services to Fortune 500 companies in many different industries.

Innovative Development has offices in Pennsylvania and New Jersey, but we provide system solutions to customers world-wide.

On-site or off-site, our solutions are provided on-time and on-budget. Fixed price or Time and Materials, we work with our clients to create the best possible working relationship.

At Innovative Development, we know that results matter. Our collaborative working relationships form the basis of our Innovative Solutions to your business system needs.
