

Quality Management

Delivering Quality Assurance & Quality Control – Quickly

Innovative Development LLC announces ID Quality, a consulting service used to deliver organizational Quality Assurance (QA) and Quality Control (QC) results, quickly and efficiently. While Quality Assurance seeks to eliminate the occurrence of issues throughout a process, Quality Control uses specific and comprehensive testing to identify and address any deficiencies that may have occurred. No matter your product or service, we can assist you in establishing processes and procedures to ensure that your end results meet your desired expectations. Our team utilizes industry best practices (e.g. ISO 9000, Total Quality Management, Six Sigma, Agile and similar methodologies, etc.) at our “Fortune 500” clients and can bring our expertise to your company also. Examples of areas in which our customers have utilized ID Quality include:

Execution of all phases of a System Development Life Cycle (SDLC), which includes planning, requirements gathering, design, development, testing, delivery and support;

Ensuring compliance to government regulations (e.g. FDA, Sarbanes-Oxley) through the proper execution of system and hardware validation activities;

Creation of Standard Operating Procedures (SOPS) emphasizing consistency within operational activities;

Internal audits with the creation and execution of corrective action plans focused on process improvement

Testing (e.g. functional, performance, automated or manual) to ensure quality deliverables

Implementation of Continuous Quality Improvement (CQI) programs.

Our Innovative Development team understands quality results matter to our clients. Our methodologies and “hands on” expertise allows us to deliver unmatched results consistently.

For further information on the ID Quality service offered at Innovative Development or to schedule a meeting to discuss your Quality Assurance/Quality Control needs, please contact us at our Corporate Headquarters or consult with your Innovative Development Customer Account Manager.

RESULTS MATTER

The senior management of Innovative Development, LLC has over 25 years experience providing IT consulting services to Fortune 500 companies in many different industries.

Innovative Development has offices in Pennsylvania and New Jersey, but we provide system solutions to customers world-wide.

On-site or off-site, our solutions are provided on-time and on-budget. Fixed price or Time and Materials, we work with our clients to create the best possible working relationship.

At Innovative Development, we know that results matter. Our collaborative working relationships form the basis of our Innovative Solutions to your business system needs.
